

LOUDON ROAD RACE SERIES TECHNICAL BULLETIN TSB 02-2017 AIR BOX CHANGES

Current 2017 Rulebook:

19.2.2.4 - Original equipment air box must remain as produced. Air filters must be used but may be Aftermarket units. Aftermarket air filters are restricted to units available via normal commercial channels and designed to mount in the stock location for that specific model machine. Aftermarket air filter units that replace part of the OEM. Air box are required to maintain the original size and number of air inlet openings as the stock unit.

The following changes to the Loudon Road Race Series (LRRS) 2017 Rulebook are effective immediately:

19.2.2.4 - Original equipment air box must remain as produced. Air filters must be used but may be Aftermarket units. Aftermarket air filters are restricted to units available via normal commercial channels and designed to mount in the stock location for that specific model / year machine. Aftermarket air filter units that replace part of the OEM Air box are required to maintain the exact model /year machine's original external dimensions including number and dimensions of air inlet openings as the stock unit.

These changes are effective immediately and replace any rulings currently in place.

Printed changes will be reflected in the 2018 print version of the Loudon Road Race Series Rulebook.
